

Salop & Herefordshire Maths Hub
Primary Update
16 January 2018

Observing Primary Maths Specialist Teachers from Shanghai

We welcome Manda and Chen from Shanghai, who will be teaching lessons and participating in post-lesson discussions at Oakmeadow Primary School, Bayston Hill, near Shrewsbury, over the next ten days. They will be observed by more than 200 Primary teachers from Salop and Herefordshire, as well as NCETM Director for Primary Maths, Debbie Morgan.

For those that have booked, please read the email with details about lift sharing, parking, arrival, bringing school ID badges (or photo ID) and mobile phone use before your visit.

We have some places available to [book](#) to observe both Manda (with Year 2) and Chen (with Year 5) teaching Multiplication, followed by a chance to experience and participate in the two post-lesson discussions. The timings are 0910-1145 for 19th, 22nd and 23rd January.

On Thursday 18th January, the timings are 0910-1215, which will include an additional 30 minute briefing with Cathryn Hardy (Teaching for Mastery Lead) and Graham Charles (Maths Hub Lead) for Headteachers and Primary Maths Leads interested in finding out more about the funded 2018-19 Teaching for Mastery Work Groups.

Please [book](#) by 0900 on Wed 17th Jan. for Thurs 18th or Fri 19th Jan.

Please [book](#) by 0900 on Thurs 18th Jan. for Mon 22nd or Tues 23rd Jan.

[Subject Knowledge Enhancement \(SKE\) - Teachers](#)

We have a small number of places available to [book](#) for Years 5 and 6:

[Years 1 and 2](#) (21st November & 5th December - Telford) - **FULL**

[Years 3 and 4](#) (19th April & 3rd May - Hereford) - **FULL**

[Years 5 and 6](#) (1st February & 15th February - Ludlow)

[Subject Knowledge Enhancement \(SKE\) - Teaching Assistants](#)

We have a small number of places available to [book](#) for our three Herefordshire based groups, which start in February. We will be looking to confirm further dates and venues for additional SKE for TAs work groups for the Summer term soon.

Where	When	Group Leader
Shropshire Chamber of Commerce, Telford	FULL	Kate Burton
St Peters School, Wem	FULL	Karen Wilding
The Marches School, Oswestry	FULL	Karen Wilding
STDC, Shrewsbury	FULL	Louise Hoskyns-Staples
Mascall Centre Ludlow	FULL	Niki Summers
Wigmore School Leominster	Mon 12 Feb, Mon 26 Feb, Mon 12 Mar	Kath Morgan
Gardner Hall, Hereford	Fri 9 Feb, Tues 27 Feb, Fri 16 Mar	Kath Morgan
Ashfield Park School. Ross-on-Wye	Fri 16 Feb, Fri 2 Mar, Tues 13 Mar	Kath Morgan

Please note that there is a minimum of 2 and a maximum of 4 bookings per school.

[Teaching for Mastery \(TfM\)](#)

[2018-19 Work Groups](#)

To register an interest in our free Primary Teaching for Mastery work groups for 2018-19, please confirm your details on the [booking form](#). In addition to the highly regarded professional learning for teachers, all participating schools receive £1000 towards cover costs, as well as up to £2000 match funding for text books from the approved DfE list.

On 18th January we have a *special briefing event for Headteachers and Primary Maths Leaders to find out more about these work groups for 2018-19 (please see item above).

[What Makes an Excellent Lesson Design](#)

Schools that are participating in our Teaching for Mastery work groups may also book:

[Years 1 and 2](#) - 6th March & 20th March - Much Wenlock

[Years 3 and 4](#) - 21st March & 25th April - Oswestry

Year 5-8 Continuity Work Groups

Have you read the EEF ['Improving Mathematics in Key Stages Two & Three' Report?](#)

Improving Mathematics in Key Stages Two and Three – Recommendations Summary

1	2	3	4	5	6	7	8
Use assessment to build on pupils' existing knowledge and understanding <ul style="list-style-type: none">Assessment should be used not only to track pupils' learning but also to provide teachers with information about what pupils do and do not know.This should inform the planning of future lessons and the focus of targeted support.Effective feedback will be an important element of teachers' response to assessment.Feedback should be specific and clear, encourage and support further effort, and be given sparingly.Teachers not only have to address misconceptions but also understand why pupils may persist with errors.Knowledge of common misconceptions can be invaluable in planning lessons to address errors before they arise.	Use manipulatives and representations <ul style="list-style-type: none">Manipulatives (physical objects used to teach maths) and representations (such as number lines and graphs) can help pupils engage with mathematical ideas.However, manipulatives and representations are just tools: how they are used is essential.They need to be used purposefully and appropriately to have an impact.There must be a clear rationale for using a particular manipulative or representation to teach a specific mathematical concept.Manipulatives should be temporary; they should act as a 'scaffold' that can be removed once independence is achieved.	Teach pupils strategies for solving problems <ul style="list-style-type: none">If pupils lack a well-rehearsed and readily available method to solve a problem they need to draw on problem-solving strategies to make sense of the unfamiliar situation.Select problem-solving tasks for which pupils do not have ready-made solutions.Teach them to use and compare different approaches.Show them how to interrogate and use their existing knowledge to solve problems.Use worked examples to enable them to analyse the use of different strategies.Require pupils to monitor, reflect on, and communicate their problem solving.	Enable pupils to develop a rich network of mathematical knowledge <ul style="list-style-type: none">Emphasise the many connections between mathematical facts, procedures, and concepts.Ensure that pupils develop fluent recall of facts.Teach pupils to understand procedures.Teach pupils to consciously choose between mathematical strategies.Build on pupils' informal understanding of sharing and proportionality to introduce procedures.Teach pupils that fractions and decimals extend the number system beyond whole numbers.Teach pupils to recognise and use mathematical structure.	Develop pupils' independence and motivation <ul style="list-style-type: none">Encourage pupils to take responsibility for, and play an active role in, their own learning.This requires pupils to develop metacognition – the ability to independently plan, monitor and evaluate their thinking and learning.Initially, teachers may have to model metacognition by describing their own thinking.Provide regular opportunities for pupils to develop metacognition by encouraging them to explain their thinking to themselves and others.Avoid doing too much too early.Positive attitudes are important, but there is scant evidence on the most effective ways to foster them.School leaders should ensure that all staff, including non-teaching staff, encourage enjoyment in maths for all children.	Use tasks and resources to challenge and support pupils' mathematics <ul style="list-style-type: none">Tasks and resources are just tools – they will not be effective if they are used inappropriately by the teacher.Use assessment of pupils' strengths and weaknesses to inform your choice of task.Use tasks to address pupil misconceptions.Provide examples and non-examples of concepts.Use stories to help pupils understand mathematics.Use tasks to build conceptual knowledge in tandem with procedural knowledge.Technology is not a silver bullet – it has to be used judiciously and less costly resources may be just as effective.	Use structured interventions to provide additional support <ul style="list-style-type: none">Selection should be guided by pupil assessment.Interventions should start early, be evidence-based and be carefully planned.Interventions should include explicit and systematic instruction.Even the best-designed intervention will not work if implementation is poor.Support pupils to understand how interventions are connected to whole-class instruction.Interventions should motivate pupils – not bore them or cause them to be anxious.If interventions cause pupils to miss activities they enjoy, or content they need to learn, teachers should ask if the interventions are really necessary.Avoid 'intervention fatigue'. Interventions do not always need to be time-consuming or intensive to be effective.	Support pupils to make a successful transition between primary and secondary school <ul style="list-style-type: none">There is a large dip in mathematical attainment and attitudes towards maths as children move from primary to secondary school.Primary and secondary schools should develop shared understandings of curriculum, teaching and learning.When pupils arrive in Year 7, quickly attain a good understanding of their strengths and weaknesses.Structured intervention support may be required for Year 7 pupils who are struggling to make progress.Carefully consider how pupils are allocated to maths classes.Setting is likely to lead to a widening of the attainment gap between disadvantaged pupils and their peers, because the former are more likely to be assigned to lower groups.

The three work groups below include professional development on 7 of the 8 report recommendations, to help pupils with coherent primary to secondary maths progression:

- 1) [Mastering Mathematics Through Deep Conceptual Understanding](#)
- 2) [Bar Modelling and Multiplicative Reasoning](#)
- 3) [Problem Solving and Reasoning](#)

Please let your local Secondary School know when booking for one of these work groups - pupils will gain more where there is a coherent approach in transition.

EYFS Development

We are taking [bookings](#) for the 2 full days and 2 half days [Hereford based work group](#) on 28th March and 18th April, a lesson observation on the morning of 25th April or 23rd May, followed by another half day on 27th June.

Network Meetings

Herefordshire

1.30pm - 3.45pm Tuesday 6 February

St Mary's Primary School, Fownhope,

- Meet the challenge of working with a wide attainment range in one class (including interventions to narrow this range)
- Dealing with very large numbers

Please confirm attendance using the [booking form](#).

Shropshire

Ludlow

Monday 23 April 2018

Bishop Hooper CE Primary School

Shrewsbury

Tuesday 24 April 2018

Shrewsbury Training and Development Centre

Oswestry

Thursday 25 April 2018

The Marches School

Click to [BOOK](#) on to any of the Shropshire meetings.

Telford

Date and venue to be confirmed

Please email for further details: cpdschoolimprovement@telford.gov.uk

Booking Form

Please use the [online booking form](#) for bookings. All work groups are **free**, with cover costs of up to £180 per day paid for teachers in their first two years of teaching.

Work groups will be added to the drop down menu on the form when dates and venues are confirmed.

Inclement Weather

Should any workshops need to be cancelled on the day, we will notify via [Twitter](#), which also has a feed on our [website](#).

Please check either Twitter or our website should you have any doubts whether the workshop will be running because of the weather conditions. The work group will be running if there is no message to inform that it has been cancelled.
